The Seminars on "Scientific Research Writing" – PhD Program in Computer Science and Mathematics

Gennaro Vessio

Assistant Professor (tenure-track)
Department of Computer Science
University of Bari Aldo Moro

February 19, 2024
11:00

Aula Gödel
Dept. of Computer Science

Learn the art (of getting published) and put it aside

"Learn the art and put it aside": an ancient saying that reminds us that, once acquired, knowledge becomes a valuable tool in our arsenal. This principle is especially pertinent to doctoral students navigating the challenging world of scholarly writing and academic publication, especially in the demanding "publish or perish" era. Today, mastering this art is not only beneficial but also essential. This seminar is designed especially for doctoral students in Machine Learning; however, its insights and lessons are equally valuable for all STEM disciplines. The seminar aims to impart practical knowledge and some experience-based wisdom not only to promote the development of high-quality research papers, but also to improve the prospects for publication in authoritative venues, which is indeed an art.

Gennaro Vessio received the M.Sc. degree (Hons.) in Computer Science (2013) and the Ph.D. degree in Computer Science and Mathematics (2017) at the Department of Computer Science, University of Bari Aldo Moro, where he is currently an Assistant Professor. His current research interests include machine and deep learning, computer vision, and their application to several domains, including e-health, drone vision, and digital humanities.
